The Future of Geological Modelling in Hydrocarbon Development - Special Publication no 309 (Geological Society Special Publication) (No.309) A. Robinson, J. Hegre, S. Price

The 3D geological model is still regarded as one of the newest and most innovative tools for reservoir management purposes. The computer modelling of structures, rock properties and fluid flow in hydrocarbon reservoirs has evolved from a specialist activity to part of the standard desktop toolkit. The application of these techniques has allowed all disciplines of the subsurface team to collaborate in a common workspace. In today's asset teams, the role of the geological model in hydrocarbon development planning is key and will be for some time ahead.

The challenges that face the geologists and engineers will be to provide more seamless interaction between static and dynamic models. This interaction requires the development of conventional and unconventional modelling algorithms and methodologies in order to provide more risk-assessed scenarios, thus enabling geologists and engineers to better understand and capture inherent uncertainties at each aspect of the geological model's life.

Also available:

Structurally Complex Reservoirs - ISBN 978-1-86239-241-0

The Relationship between Damage and Localization - ISBN 978-1-86239-236-6

Imaging, Mapping and Modelling Continental Lithosphere Extension and Breakup - ISBN 978-1-86239-228-1

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides

From reader reviews:

John Caldwell:

As people who live in the particular modest era should be change about what going on or facts even knowledge to make these individuals keep up with the era that is certainly always change and move forward. Some of you maybe will update themselves by looking at books. It is a good choice for you personally but the problems coming to you actually is you don't know what type you should start with. This The Future of Geological Modelling in Hydrocarbon Development - Special Publication no 309 (Geological Society Special Publication) (No.309) is our recommendation to cause you to keep up with the world. Why, because book serves what you want and wish in this era.

Joni Thompson:

Information is provisions for people to get better life, information presently can get by anyone in everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider if those information which is inside the former life are hard to be find than now is taking seriously which one is suitable to believe or which one the resource are convinced. If you find the unstable resource then you buy it as your main information it will have huge disadvantage for you. All those possibilities will not happen in you if you take The Future of Geological Modelling in Hydrocarbon Development - Special Publication no 309 (Geological Society Special Publication) (No.309) as your daily resource information.

Patrick Duenas:

You could spend your free time to see this book this reserve. This The Future of Geological Modelling in Hydrocarbon Development - Special Publication no 309 (Geological Society Special Publication) (No.309) is simple to develop you can read it in the park, in the beach, train as well as soon. If you did not possess much space to bring the particular printed book, you can buy the e-book. It is make you better to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

Joshua Stickley:

Book is one of source of expertise. We can add our know-how from it. Not only for students but native or citizen need book to know the revise information of year to be able to year. As we know those publications have many advantages. Beside we all add our knowledge, can also bring us to around the world. With the book The Future of Geological Modelling in Hydrocarbon Development - Special Publication no 309 (Geological Society Special Publication) (No.309) we can acquire more advantage. Don't someone to be creative people? For being creative person must want to read a book. Merely choose the best book that acceptable with your aim. Don't end up being doubt to change your life with this book The Future of Geological Modelling in Hydrocarbon Development - Special Publication no 309 (Geological Society

Special Publication) (No.309). You can more appealing than now.
