Sample Size Calculations in Clinical Research (Chapman & Hall/CRC Biostatistics Series) Shein-Chung Chow, Hansheng Wang, Jun Shao

Sample size calculation plays an important role in clinical research. It is not uncommon, however, to observe discrepancies among study objectives (or hypotheses), study design, statistical analysis (or test statistic), and sample size calculation. Focusing on sample size calculation for studies conducted during the various phases of clinical research and development, *Sample Size Calculation in Clinical Research* explores the causes of discrepancies and how to avoid them.

This volume provides formulas and procedures for determination of sample size required not only for testing equality, but also for testing non-inferiority/superiority, and equivalence (similarity) based on both untransformed (raw) data and log-transformed data under a parallel-group design or a crossover design with equal or unequal ratio of treatment allocations. It contains a comprehensive and unified presentation of statistical procedures for sample size calculation that are commonly employed at various phases of clinical development. Each chapter includes, whenever possible, real examples of clinical studies from therapeutic areas such as cardiovascular, central nervous system, anti-infective, oncology, and women's health to demonstrate the clinical and statistical concepts, interpretations, and their relationships and interactions.

The book highlights statistical procedures for sample size calculation and justification that are commonly employed in clinical research and development. It provides clear, illustrated explanations of how the derived formulas and/or statistical procedures can be used.

From reader reviews:

David Bergeron:

Nowadays reading books are more than want or need but also work as a life style. This reading practice give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The data you get based on what kind of book you read, if you want drive more knowledge just go with education and learning books but if you want really feel happy read one with theme for entertaining for instance comic or novel. Typically the Sample Size Calculations in Clinical Research (Chapman & Hall/CRC Biostatistics Series) is kind of publication which is giving the reader unstable experience.

Glenn Stops:

The actual book Sample Size Calculations in Clinical Research (Chapman & Hall/CRC Biostatistics Series) will bring one to the new experience of reading some sort of book. The author style to clarify the idea is very unique. Should you try to find new book you just read, this book very suitable to you. The book Sample Size Calculations in Clinical Research (Chapman & Hall/CRC Biostatistics Series) is much recommended to you to read. You can also get the e-book through the official web site, so you can more easily to read the book.

Robert Wilkes:

Spent a free time to be fun activity to perform! A lot of people spent their leisure time with their family, or their very own friends. Usually they accomplishing activity like watching television, gonna beach, or picnic within the park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Might be reading a book may be option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to consider look for book, may be the e-book untitled Sample Size Calculations in Clinical Research (Chapman & Hall/CRC Biostatistics Series) can be good book to read. May be it could be best activity to you.

Darlene Goins:

Playing with family in a very park, coming to see the coastal world or hanging out with close friends is thing that usually you have done when you have spare time, in that case why you don't try matter that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Sample Size Calculations in Clinical Research (Chapman & Hall/CRC Biostatistics Series), you could enjoy both. It is very good combination right, you still wish to miss it? What kind of hang type is it? Oh can occur its mind hangout folks. What? Still don't understand it, oh come on its identified as reading friends.
