The study of curriculum, beginning in the early 20th century, first served the areas of school administration and teaching and was used to design and develop programs of study. The field subsequently expanded and drew upon disciplines from the arts, humanities, and social sciences to examine larger educational forces and their effects upon the individual, society, and conceptions of knowledge. Curriculum studies now embraces an array of academic scholarship in relation to personal and institutional needs and interests while it also focuses upon a diverse and complex dynamic among educational experiences, practices, settings, actions, and theories.

The **Encyclopedia of Curriculum Studies** provides a comprehensive introduction to the academic field of curriculum studies for the scholar, student, teacher, and administrator. This two-volume set serves to inform and to introduce terms, events, documents, biographies, and concepts to assist the reader in understanding aspects of this rapidly changing, expansive, and contested field of study.
