Explore the New Frontiers of Nature

Neo-Giants, hairy, upright creatures-the classic Sasquatch-spotted and filmed by two men in Six Rivers National Forest, California...

True Giants, like the "nyalmo" of the Himalayas, the cannibals of folklore, often fifteen feet tall, leave startling two foot long, four-toed tracks in the mud and snow...

Merbeings, known as "chupacabras," spiny-backed primates frequently blamed for the mutilation of sheep, goats, and other animals, sighted last year in Puerto Rico, the United States and Brazil...

Thousands of reports of a wide variety of mysterious primates have intrigued humans since the beginning of recorded history, yet these shy and reclusive beings have eluded the most diligent attempts to verify their existence. Here is the first-ever comprehensive study on an astonishing variety of puzzling apelike and humanlike animals that are still being seen today. This fully referenced volume includes range maps and typical footprints for each type of undiscovered creature sighted around the world, as well as:

- Actual eyewitness accounts of sightings
- Detailed Illustrations
- Newest findings in an exciting branch of cryptozoology
- Likeliest locales and most common subtypes for sighting
- Advice on what to do if a sighting occurs
- And much more!
