Experimental Designs: Exercises and Solutions

D. G. Kabe, Arjun K. Gupta

Experimental Designs: Exercises and Solutions D. G. Kabe, Arjun K. Gupta

This volume is a collection of exercises with their solutions in Design and Analysis of Experiments. At present there is not a single book which collects such exercises. These exercises have been collected by the authors during the last four decades during their student and teaching years. They should prove useful to graduate students and research workers in Statistics. In Chapter I, theoretical results that are needed for understanding the material in this book, are given. Chapter 2 lists the exercises which have been collected by the authors. The solutions of these problems are given in Chapter 3. Finally an index is provided for quick reference. Grateful appreciation for financial support for Dr. Kabe's research at St. Mary's University is extended to National Research Council of Canada and St. Mary's University Senate Research Committee. For his visit to the Department of Mathematics and Statistics the authors are thankful to the Bowling Green State University.
