Building Internet Firewalls

Elizabeth D. Zwicky, Simon Cooper, D. Brent Chapman

Building Internet Firewalls Elizabeth D. Zwicky, Simon Cooper, D. Brent Chapman

In the five years since the first edition of this classic book was published, Internet use has exploded. The commercial world has rushed headlong into doing business on the Web, often without integrating sound security technologies and policies into their products and methods. The security risks--and the need to protect both business and personal data--have never been greater. We've updated *Building Internet Firewalls* to address these newer risks.

What kinds of security threats does the Internet pose? Some, like password attacks and the exploiting of known security holes, have been around since the early days of networking. And others, like the distributed denial of service attacks that crippled Yahoo, E-Bay, and other major e-commerce sites in early 2000, are in current headlines.

Firewalls, critical components of today's computer networks, effectively protect a system from most Internet security threats. They keep damage on one part of the network--such as eavesdropping, a worm program, or file damage--from spreading to the rest of the network. Without firewalls, network security problems can rage out of control, dragging more and more systems down.

Like the bestselling and highly respected first edition, *Building Internet Firewalls*, 2nd Edition, is a practical and detailed step-by-step guide to designing and installing firewalls and configuring Internet services to work with a firewall. Much expanded to include Linux and Windows coverage, the second edition describes:

- Firewall technologies: packet filtering, proxying, network address translation, virtual private networks
- Architectures such as screening routers, dual-homed hosts, screened hosts, screened subnets, perimeter networks, internal firewalls
- Issues involved in a variety of new Internet services and protocols through a firewall
- Email and News
- Web services and scripting languages (e.g., HTTP, Java, JavaScript, ActiveX, RealAudio, RealVideo)
- File transfer and sharing services such as NFS, Samba
- Remote access services such as Telnet, the BSD "r" commands, SSH, BackOrifice 2000
- Real-time conferencing services such as ICQ and talk
- Naming and directory services (e.g., DNS, NetBT, the Windows Browser)
- Authentication and auditing services (e.g., PAM, Kerberos, RADIUS);
- Administrative services (e.g., syslog, SNMP, SMS, RIP and other routing protocols, and ping and other network diagnostics)
- Intermediary protocols (e.g., RPC, SMB, CORBA, IIOP)
- Database protocols (e.g., ODBC, JDBC, and protocols for Oracle, Sybase, and Microsoft SQL Server)
- The book's complete list of resources includes the location of many publicly available firewall construction tools.

From reader reviews:

Ronnie Hamilton:

The book Building Internet Firewalls can give more knowledge and also the precise product information about everything you want. So just why must we leave the best thing like a book Building Internet Firewalls? A number of you have a different opinion about e-book. But one aim this book can give many information for us. It is absolutely correct. Right now, try to closer with your book. Knowledge or information that you take for that, you could give for each other; you could share all of these. Book Building Internet Firewalls has simple shape but the truth is know: it has great and big function for you. You can appear the enormous world by wide open and read a guide. So it is very wonderful.

Reginald McDade:

Spent a free time to be fun activity to do! A lot of people spent their spare time with their family, or their friends. Usually they accomplishing activity like watching television, about to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Can be reading a book might be option to fill your free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to attempt look for book, may be the guide untitled Building Internet Firewalls can be fine book to read. May be it can be best activity to you.

Pedro Dillon:

Often the book Building Internet Firewalls has a lot of information on it. So when you make sure to read this book you can get a lot of help. The book was written by the very famous author. The writer makes some research prior to write this book. This particular book very easy to read you can obtain the point easily after reading this article book.

Raymond Albanese:

Beside this Building Internet Firewalls in your phone, it might give you a way to get nearer to the new knowledge or data. The information and the knowledge you are going to got here is fresh from the oven so don't end up being worry if you feel like an aged people live in narrow commune. It is good thing to have Building Internet Firewalls because this book offers for your requirements readable information. Do you occasionally have book but you seldom get what it's about. Oh come on, that won't happen if you have this with your hand. The Enjoyable set up here cannot be questionable, such as treasuring beautiful island. Use you still want to miss it? Find this book in addition to read it from now!
