Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series) Ali Hirsa

As today's financial products have become more complex, quantitative analysts, financial engineers, and others in the financial industry now require robust techniques for numerical analysis. Covering advanced quantitative techniques, **Computational Methods in Finance** explains how to solve complex functional equations through numerical methods.

The first part of the book describes pricing methods for numerous derivatives under a variety of models. The book reviews common processes for modeling assets in different markets. It then examines many computational approaches for pricing derivatives. These include transform techniques, such as the fast Fourier transform, the fractional fast Fourier transform, the Fourier-cosine method, and saddlepoint method; the finite difference method for solving PDEs in the diffusion framework and PIDEs in the pure jump framework; and Monte Carlo simulation.

The next part focuses on essential steps in real-world derivative pricing. The author discusses how to calibrate model parameters so that model prices are compatible with market prices. He also covers various filtering techniques and their implementations and gives examples of filtering and parameter estimation.

Developed from the author's courses at Columbia University and the Courant Institute of New York University, this self-contained text is designed for graduate students in financial engineering and mathematical finance as well as practitioners in the financial industry. It will help readers accurately price a vast array of derivatives.

From reader reviews:

Barbara Richardson:

The knowledge that you get from Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series) could be the more deep you searching the information that hide inside the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to understand but Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series) giving you excitement feeling of reading. The author conveys their point in particular way that can be understood through anyone who read that because the author of this guide is well-known enough. This kind of book also makes your personal vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this specific Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series) instantly.

Gary Roth:

Reading a publication can be one of a lot of task that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a publication will give you a lot of new details. When you read a e-book you will get new information since book is one of various ways to share the information or maybe their idea. Second, reading a book will make you more imaginative. When you looking at a book especially fictional works book the author will bring one to imagine the story how the personas do it anything. Third, you are able to share your knowledge to other individuals. When you read this Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series), it is possible to tells your family, friends along with soon about yours e-book. Your knowledge can inspire average, make them reading a guide.

Betty Jordan:

Don't be worry if you are afraid that this book will filled the space in your house, you might have it in e-book technique, more simple and reachable. This kind of Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series) can give you a lot of good friends because by you checking out this one book you have issue that they don't and make anyone more like an interesting person. This book can be one of one step for you to get success. This publication offer you information that perhaps your friend doesn't understand, by knowing more than other make you to be great individuals. So , why hesitate? Let us have Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series).

Tammy Carver:

Reserve is one of source of expertise. We can add our expertise from it. Not only for students and also native or citizen will need book to know the update information of year to be able to year. As we know those publications have many advantages. Beside we all add our knowledge, may also bring us to around the world. By the book Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics

Series) we can take more advantage. Don't you to be creative people? Being creative person must love to read a book. Just simply choose the best book that appropriate with your aim. Don't be doubt to change your life with this book Computational Methods in Finance (Chapman and Hall/CRC Financial Mathematics Series). You can more desirable than now.
