**Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series)** Nikitas-Spiros Koutsoukis, Gautam Mitra

In **Decision Modelling And Information Systems: The Information Value Chain** the authors explain the interrelationships between the decision support, decision modelling, and information systems.

The first two parts of the book focus on the interdisciplinary decision support framework, in which mathematical programming (optimization) is taken as the inference engine. The role of business analytics and its relationship with recent developments in organisational theory, decision modelling, information systems and information technology are considered in depth. Part three of the book includes a carefully chosen selection of invited contributions from internationally-known researchers. These contributions are thought-provoking and cover key decision modelling and information systems issues.

The final part of the book covers contemporary developments in the related area of business intelligence considered within an organizational context. The topics cover computing delivered across the web, management decision-making, and socio-economic challenges that lie ahead. It is now well accepted that globalisation and the impact of digital economy are profound; and the role of e-business and the delivery of decision models (business analytics) across the net lead to a challenging business environment. In this dynamic setting, decision support is one of the few interdisciplinary frameworks that can be rapidly adopted and deployed to so that businesses can survive and prosper by meeting these new challenges.

**From reader reviews:**

**Nathaniel Gonzalez:**

Within other case, little individuals like to read book Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series). You can choose the best book if you like reading a book. Provided that we know about how is important the book Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series). You can add expertise and of course you can around the world with a book. Absolutely right, since from book you can recognize everything! From your country until finally foreign or abroad you may be known. About simple issue until wonderful thing you are able to know that. In this era, we could open a book or maybe searching by internet product. It is called e-book. You can use it when you feel uninterested to go to the library. Let's examine.

**Emile Guzman:**

The book Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) can give more knowledge and information about everything you want. Exactly why must we leave the great thing like a book Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series)? Some of you have a different opinion about publication. But one aim in which book can give many info for us. It is absolutely right. Right now, try to closer using your book. Knowledge or facts that you take for that, you are able to give for each other; you are able to share all of these. Book Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) has simple shape but you know: it has great and big function for you. You can seem the enormous world by wide open and read a book. So it is very wonderful.

**Stanley Torres:**

As people who live in the modest era should be upgrade about what going on or information even knowledge to make them keep up with the era which can be always change and make progress. Some of you maybe will probably update themselves by examining books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what one you should start with. This Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

**Maria Green:**

Reading a book being new life style in this 12 months; every people loves to study a book. When you go through a book you can get a great deal of benefit. When you read guides, you can improve your knowledge,

because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you would like get information about your study, you can read education books, but if you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, as well as soon. The Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) offer you a new experience in reading through a book.
