Earth Sheltered Housing: Principles in Practice Max Terman

One of our most important objectives as humans have provided basic principles from scientific man is to discover and pass on ways of living journals and books and summarized the experience with our environment. Every form of life, in the sciences of people actually living in earth sheltering including human, depends on nature's ability to produce clean air, pure water and fertile soil. In the growth and development of any field and to recycle wastes. It is our duty to live in a manner of knowledge, there comes a time when theory and practice are refined in the light of experience. Such is the case with earth sheltering. A good foundation of conditions in buildings is an old but recently rediscovered technique. It holds much promise. Excellent efforts of such organizations as the United Nations for allowing us to use less energy and preserve underground space. Center of the University of Minnesota, the School of Architecture at Oklahoma State University, and the many design to achieve self-reliance and independence from professionals active in earth sheltering. These limited sources of fossil fuels.
