From Day Job to Passive Income (Truly Passive Income Series): Transition Into a 4 Hour Workweek by Turning Your Day Job Expertise Into Multiple Streams of Passive Income Melissa Darnell

This isn't just another run-of-the-mill book on passive income, home-based businesses and side hustle "secrets". I know, because I've read most of them hoping to find something new to guide my own entrepreneurial efforts over the years. And most of them turn out to be a rehash of the same old strategies over and over again.

This book is different.

It will teach you:

- popular concepts from the Rich Dad Poor Dad and 4 Hour Work Week books, including exactly what passive income is, and why it's so important to consider before ever starting a side business.
- how to apply these passive income generating concepts to one or more of 6 categories of markets with tried and tested automated systems in place

You'll learn how to turn your day job expertise (or your personal passions) into money making streams of income by taking advantage of the opportunities recently created through changes in internationally popular marketplace such as:

- Etsy and its new digital product system
- the virtual world of Second Life and its new Marketplace setup (no in-world land required now!)
- the emerging technology of 3D printing on demand (no special equipment or technical expertise needed!)
- print on demand products
- custom textiles and wallpaper

What this book will also do is:

- offer you a way to start one or more side businesses from home that won't take up a lot of your time
- teach you how to leverage what you know and love by giving you 20 widely varying day job industries as case study examples, then breaking down in detail how to use multiple passive income systems within each of those industries to create several passive income streams
- explain how these passive income streams will actually help you become more marketable if you are hunting for a day job
- show you how in one year's time you could have 365 (or more!) passive income products in your portfolio of assets

This series is geared towards helping anyone with a basic level of computer skills to take advantage of these emerging marketplace opportunities. You will also be shown how to use multiple marketplaces together, or only use the ones that you like to work with best. You can work on this type of passive income/residual income business only when you are able to, so you can keep your day job while slowly building up your retirement funds if you want.

And these recommended passive income systems will work especially great for you if any of the following

situations apply to you:

- if you have a day job or business that takes up the majority of your time
- if you have a busy family schedule
- if you are an introvert
- if you have a chronic illness or physical disability that means you never know when you'll be able to work even on a home-based business
- if you have the desire to travel all over the world and not be chained to one location while still being an entrepreneur
- if you have little or no money to start a business with
- if you are retired and just want a side business or a business that doesn't take up a lot of your free time
- if you want to be able to afford to retire someday but don't have a lot of free time right now to work for a supplemental income
- if you have little to no technical skills other than the ability to work a computer and use the internet
- even if you have zero people management or leadership skills!

If any of these situations apply to you and your life, and you are looking for a zero risk, slow-and-steady-wins-the-race kind of passive income side business, then this just might be the book for you!
