Being Human: New Scientist: The Collection New Scientist

If there's one thing we're all expert at, it's being human. It's something we do 24/7 for our whole lives. So you can be forgiven for thinking that you know pretty much everything there is to know about being a member of the species we call Homo sapiens.

But do you? Consider these questions: where does our sense of self come from? Why are we so argumentative? What's the secret of success? Why did we evolve to rely on friendship? What do our non-verbal signals really reveal?

Being Human is the inside story of what it means to be one of us.

It will lay bare the essence of human nature, our mind, body, self and emotions, and our relationships with one another and our possessions. There's also the personal, including what makes you unique, what your voice says about you and how birth order influences your personality and health. This handbook to humanity will even reveal how you can make the best of being human. You'll never see yourself in the same way again.
