Foundations for Community Health Workers

Foundations for Community Health Workers is a training resource for client- and community-centered public health

practitioners, with an emphasis on promoting health equality. Based on City College of San Francisco's CHW Certificate

Program, it begins with an overview of the historic and political context informing the practice of community health

workers. The second section of the book addresses core competencies for working with individual clients, such as

behavior change counseling and case management, and practitioner development topics such as ethics, stress management, and conflict resolution. The book's final section covers skills for practice at the group and community levels, such as

conducting health outreach and facilitating community organizing and advocacy.
