**Adaptive Control: Second Edition (Dover Books on Electrical Engineering)** Karl J. Astrom, Dr. Bjorn Wittenmark

Suitable for advanced undergraduates and graduate students, this text introduces theoretical and practical aspects of adaptive control. It offers an excellent perspective on techniques as well as an active knowledge of key approaches. Readers will acquire a well-developed sense of when to use adaptive techniques and when other methods are more appropriate.

Starting with a broad overview, the text explores real-time estimation, self-tuning regulators and model-reference adaptive systems, stochastic adaptive control, and automatic tuning of regulators. Additional topics include gain scheduling, robust high-gain control and self-oscillating controllers, and suggestions for implementing adaptive controllers. Concluding chapters feature a summary of applications and a brief review of additional areas closely related to adaptive control.

Both authors are Professors at the Lund Institute of Technology in Sweden, and this text has evolved from their many years of research and teaching. Their insights into properties, design procedures, and implementation of adaptive controllers are complemented by the numerous examples, simulations, and problems that appear throughout the book.

### **From reader reviews:**

#### **Tammi Kendrick:**

Book is to be different per grade. Book for children until eventually adult are different content. As you may know that book is very important for all of us. The book Adaptive Control: Second Edition (Dover Books on Electrical Engineering) ended up being making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The guide Adaptive Control: Second Edition (Dover Books on Electrical Engineering) is not only giving you considerably more new information but also for being your friend when you experience bored. You can spend your personal spend time to read your publication. Try to make relationship with the book Adaptive Control: Second Edition (Dover Books on Electrical Engineering). You never experience lose out for everything in the event you read some books.

#### **Emily Walker:**

As people who live in typically the modest era should be revise about what going on or data even knowledge to make all of them keep up with the era which is always change and make progress. Some of you maybe can update themselves by looking at books. It is a good choice to suit your needs but the problems coming to you actually is you don't know which you should start with. This Adaptive Control: Second Edition (Dover Books on Electrical Engineering) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

#### **Corinne Parsons:**

Information is provisions for people to get better life, information nowadays can get by anyone at everywhere. The information can be a expertise or any news even a huge concern. What people must be consider when those information which is inside former life are challenging to be find than now's taking seriously which one is acceptable to believe or which one often the resource are convinced. If you get the unstable resource then you get it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take Adaptive Control: Second Edition (Dover Books on Electrical Engineering) as the daily resource information.

#### **Mildred Lucas:**

As we know that book is significant thing to add our know-how for everything. By a e-book we can know everything we want. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This e-book Adaptive Control: Second Edition (Dover Books on Electrical Engineering) was filled about science. Spend your time to add your knowledge about your technology competence. Some people has various feel when they reading the book. If you know how big benefit of a book, you can sense enjoy to read a book. In the modern era like at this point, many ways to get book that you just wanted.
