Getting Started with the Internet of Things: Connecting Sensors and Microcontrollers to the Cloud (Make: Projects) Cuno Pfister

What *is* the Internet of Things? It's billions of embedded computers, sensors, and actuators all connected online. If you have basic programming skills, you can use these powerful little devices to create a variety of useful systems—such as a device that waters plants when the soil becomes dry. This hands-on guide shows you how to start building your own fun and fascinating projects.

Learn to program embedded devices using the .NET Micro Framework and the Netduino Plus board. Then connect your devices to the Internet with Pachube, a cloud platform for sharing real-time sensor data. All you need is a Netduino Plus, a USB cable, a couple of sensors, an Ethernet connection to the Internet—and your imagination.

- Develop programs with simple outputs (actuators) and inputs (sensors)
- Learn about the Internet of Things and the Web of Things
- Build client programs that push sensor readings from a device to a web service
- Create server programs that allow you to control a device over the Web
- Get the .NET classes and methods needed to implement all of the book's examples

From reader reviews:

Gwen Dawes:

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to find out everything in the world. Each publication has different aim or maybe goal; it means that publication has different type. Some people truly feel enjoy to spend their a chance to read a book. They may be reading whatever they acquire because their hobby is usually reading a book. What about the person who don't like examining a book? Sometime, man or woman feel need book once they found difficult problem or maybe exercise. Well, probably you'll have this Getting Started with the Internet of Things: Connecting Sensors and Microcontrollers to the Cloud (Make: Projects).

Christopher Scoville:

What do you about book? It is not important to you? Or just adding material when you really need something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everyone has many questions above. They should answer that question since just their can do that will. It said that about e-book. Book is familiar on every person. Yes, it is right. Because start from on pre-school until university need this Getting Started with the Internet of Things: Connecting Sensors and Microcontrollers to the Cloud (Make: Projects) to read.

Virginia White:

Your reading 6th sense will not betray an individual, why because this Getting Started with the Internet of Things: Connecting Sensors and Microcontrollers to the Cloud (Make: Projects) guide written by well-known writer who really knows well how to make book which can be understand by anyone who have read the book. Written with good manner for you, leaking every ideas and publishing skill only for eliminate your current hunger then you still uncertainty Getting Started with the Internet of Things: Connecting Sensors and Microcontrollers to the Cloud (Make: Projects) as good book not only by the cover but also by the content. This is one reserve that can break don't judge book by its include, so do you still needing a different sixth sense to pick this specific!? Oh come on your looking at sixth sense already alerted you so why you have to listening to another sixth sense.

Joyce Jiminez:

Reading a book for being new life style in this season; every people loves to go through a book. When you learn a book you can get a large amount of benefit. When you read books, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your review, you can read education books, but if you want to entertain yourself read a fiction books, these us novel, comics, and also soon. The Getting Started with the Internet of Things: Connecting Sensors and Microcontrollers to the Cloud (Make: Projects) will give

you a new experience in examining a book.
