## Analytical Methods for Dynamic Modelers

Simulation modeling is increasingly integrated into research and policy analysis of complex sociotechnical systems in a variety of domains. Model-based analysis and policy design inform a range of applications in fields from economics to engineering to health care. This book offers a hands-on introduction to key analytical methods for dynamic modeling. Bringing together tools and methodologies from fields as diverse as computational statistics, econometrics, and operations research in a single text, the book can be used for graduate-level courses and as a reference for dynamic modelers who want to expand their methodological toolbox.

The focus is on quantitative techniques for use by dynamic modelers during model construction and analysis, and the material presented is accessible to readers with a background in college-level calculus and statistics. Each chapter describes a key method, presenting an introduction that emphasizes the basic intuition behind each method, tutorial style examples, references to key literature, and exercises. The chapter authors are all experts in the tools and methods they present. The book covers estimation of model parameters using quantitative data; understanding the links between model structure and its behavior; and decision support and optimization. An online appendix offers computer code for applications, models, and solutions to exercises.

**Contributors**Wenyi An, Edward G. Anderson Jr., Yaman Barlas, Nishesh Chalise, Robert Eberlein, Hamed Ghoddsi, Winfried Grassmann, Peter S. Hovmand, Mohammad S. Jalali, Nitin Joglekar, David Keith, Juxin Liu, Erling Moxnes, Rogelio Oliva, Nathaniel D. Osgood, Hazhir Rahmandad, Raymond Spiteri, John Sterman, Jeroen Struben, Burcu Tan, Karen Yee, Gönenç Yücel

### From reader reviews:

#### Virginia Villalon:

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite book and reading a reserve. Beside you can solve your condition; you can add your knowledge by the guide entitled Analytical Methods for Dynamic Modelers. Try to stumble through book Analytical Methods for Dynamic Modelers as your buddy. It means that it can to become your friend when you feel alone and beside those of course make you smarter than in the past. Yeah, it is very fortunated for yourself. The book makes you far more confidence because you can know every thing by the book. So , let me make new experience in addition to knowledge with this book.

#### Margaret Pinson:

This Analytical Methods for Dynamic Modelers book is simply not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is information inside this book incredible fresh, you will get information which is getting deeper you read a lot of information you will get. This kind of Analytical Methods for Dynamic Modelers without we know teach the one who looking at it become critical in pondering and analyzing. Don't be worry Analytical Methods for Dynamic Modelers can bring whenever you are and not make your tote space or bookshelves' turn out to be full because you can have it with your lovely laptop even cell phone. This Analytical Methods for Dynamic Modelers having great arrangement in word and layout, so you will not really feel uninterested in reading.

#### David Bostick:

People live in this new morning of lifestyle always try and and must have the extra time or they will get lot of stress from both everyday life and work. So , if we ask do people have extra time, we will say absolutely yes. People is human not really a huge robot. Then we inquire again, what kind of activity do you have when the spare time coming to anyone of course your answer may unlimited right. Then do you ever try this one, reading books. It can be your alternative with spending your spare time, the actual book you have read is usually Analytical Methods for Dynamic Modelers.

#### Michael Sherman:

Do you like reading a guide? Confuse to looking for your best book? Or your book had been rare? Why so many question for the book? But just about any people feel that they enjoy with regard to reading. Some people likes looking at, not only science book but additionally novel and Analytical Methods for Dynamic Modelers or others sources were given understanding for you. After you know how the great a book, you feel want to read more and more. Science publication was created for teacher or perhaps students especially. Those publications are helping them to increase their knowledge. In other case, beside science guide, any other book likes Analytical Methods for Dynamic Modelers to make your spare time much more colorful. Many types of book like this one.
