The Smartest Animals on the Planet: Extraordinary Tales of the Natural World's Cleverest Creatures
Sally Boysen, Deborah Custance

How animals communicate and learn -- sometimes better than humans do, actually.

This fascinating book, written by a world authority on animal intelligence, brings together the cumulative research on the comparative intelligence levels of nonhuman "smart" species. **Sally Boysen** reveals how these intelligent animals communicate, learn behavior, show feelings and emotions and, for some species, how they use tools, count and sometimes pick up a foreign language.

Fully illustrated with photographs and step-by-step graphics, the book draws on data from historical and current experiments and observations to examine intelligence in the great apes (gorillas, chimpanzees and orangutans) and in a surprising list of other species, including sea otters, eagles, elephants, dolphins, birds, bees, beetles, rats, raccoons and parrots.

The book's chapters are:

- Comparing Animal Skills and Intelligence
- Animal Tool Use
- Communication in Animals
- Imitation and Social Learning
- Social Cognition and Emotion
- Self-recognition and Awareness
- Numerical Abilities in Animals
- Animals and Human Nonverbal Language.

The Smartest Animals on the Planet is a beautiful, authoritative and up-to-date presentation on the remarkable intelligence of the animal kingdom.
