The Universe Is a Dream: The Secrets of Existence Revealed Alexander Marchand

Have you ever contemplated the cause of the universe beyond simply attributing it to God or The Big Bang? If so, have you ever entertained the idea that the universe is but a dream? Which is to say, have you ever considered that the cause of the universe is that you dreamt it up? At first glance, the idea that you dreamt up the universe perhaps seems implausible. However, what if you really took that idea seriously and followed it to its logical conclusion? What would you discover? Well, this book answers that question. Using the unique form of a graphic novel, artist and writer Alexander Marchand takes you on an artistic, humorous, irreverent, and extremely informative romp through the advanced, nondualistic metaphysics of the contemporary spiritual document known as A Course in Miracles. In the end, you'll not only have a coherent picture of the true nature of the universe and existence, but you'll also have essential, practical knowledge of what you'll need to do to if you are ready to wake up. However, be forewarned that if you expect this book to prove to you that the universe is a dream, you'll be disappointed. The only way to prove a dream is a dream is to wake up. Therefore, although the book provides the hypothesis and the parameters of the experiment to prove that the universe is a dream, you'll have to be willing to do the experiment yourself. Consequently, if you refuse to do the experiment, you'll probably hate the book and all irony of your hate for the book will be lost to you. But if you embrace the book's logically consistent message of peace and are thus willing to do the experiment--which you'll find is an experiment of uncompromising forgiveness--you'll love it.
