Evaluation of Dampness-Associated Respiratory Symptoms with Relocation of Staff during Remediation of an Elementary School (Health Hazard Evaluation Report: HETA 2009-0172-3124) Rachel Bailey, Ju-Hyeong Park, Rena Saito, Kathleen Kreiss, Jean Cox-Ganser, Department of Health and Human Services Centers for Disease Control and Prevention, National Institute for Occupational Safety and Health

In June 2009, school district management requested a health hazard evaluation to investigate concerns about indoor environmental quality at an elementary school. Since August 2005, after renovations and the addition of three classroom wings, there have been many issues regarding indoor environmental quality, including building-related symptoms and a history of dampness, mold growth, high humidity, and ventilation problems. The NIOSH briefly summarize their findings in this report.
