Algebraic Combinatorics: Walks, Trees, Tableaux, and More (Undergraduate Texts in Mathematics)

Richard Stanley

Written by one of the foremost experts in the field, *Algebraic Combinatorics* is a unique undergraduate textbook that will prepare the next generation of pure and applied mathematicians. The combination of the author's extensive knowledge of combinatorics and classical and practical tools from algebra will inspire motivated students to delve deeply into the fascinating interplay between algebra and combinatorics. Readers will be able to apply their newfound knowledge to mathematical, engineering, and business models.

The text is primarily intended for use in a one-semester advanced undergraduate course in algebraic combinatorics, enumerative combinatorics, or graph theory. Prerequisites include a basic knowledge of linear algebra over a field, existence of finite fields, and group theory. The topics in each chapter build on one another and include extensive problem sets as well as hints to selected exercises. Key topics include walks on graphs, cubes and the Radon transform, the Matrix–Tree Theorem, and the Sperner property. There are also three appendices on purely enumerative aspects of combinatorics related to the chapter material: the RSK algorithm, plane partitions, and the enumeration of labeled trees.

Richard Stanley is currently professor of Applied Mathematics at the Massachusetts Institute of Technology. Stanley has received several awards including the George Polya Prize in applied combinatorics, the Guggenheim Fellowship, and the Leroy P. Steele Prize for mathematical exposition. **Also by the author:** *Combinatorics and Commutative Algebra*, Second Edition, © Birkhauser.

From reader reviews:

Douglas Whatley:

What do you regarding book? It is not important together with you? Or just adding material when you need something to explain what you problem? How about your free time? Or are you busy particular person? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have free time? What did you do? Everyone has many questions above. They should answer that question because just their can do which. It said that about publication. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need that Algebraic Combinatorics: Walks, Trees, Tableaux, and More (Undergraduate Texts in Mathematics) to read.

Gladys Myers:

The knowledge that you get from Algebraic Combinatorics: Walks, Trees, Tableaux, and More (Undergraduate Texts in Mathematics) could be the more deep you searching the information that hide within the words the more you get interested in reading it. It doesn't mean that this book is hard to be aware of but Algebraic Combinatorics: Walks, Trees, Tableaux, and More (Undergraduate Texts in Mathematics) giving you excitement feeling of reading. The copy writer conveys their point in particular way that can be understood by means of anyone who read it because the author of this guide is well-known enough. This particular book also makes your own vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We highly recommend you for having this specific Algebraic Combinatorics: Walks, Trees, Tableaux, and More (Undergraduate Texts in Mathematics) instantly.

Elizabeth Fischer:

This Algebraic Combinatorics: Walks, Trees, Tableaux, and More (Undergraduate Texts in Mathematics) are usually reliable for you who want to certainly be a successful person, why. The reason of this Algebraic Combinatorics: Walks, Trees, Tableaux, and More (Undergraduate Texts in Mathematics) can be one of several great books you must have is definitely giving you more than just simple looking at food but feed you actually with information that possibly will shock your previous knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed ones. Beside that this Algebraic Combinatorics: Walks, Trees, Tableaux, and More (Undergraduate Texts in Mathematics) giving you an enormous of experience for instance rich vocabulary, giving you demo of critical thinking that we understand it useful in your day pastime. So , let's have it and luxuriate in reading.

Nancy Maxfield:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Attempt to pick one book that you never know the inside because don't evaluate book by its cover may doesn't work is difficult job because you are frightened that the inside maybe not since fantastic as in the

outside search likes. Maybe your answer might be Algebraic Combinatorics: Walks, Trees, Tableaux, and More (Undergraduate Texts in Mathematics) why because the amazing cover that makes you consider with regards to the content will not disappoint a person. The inside or content is definitely fantastic as the outside or maybe cover. Your reading 6th sense will directly guide you to pick up this book.
