Discussion-Based Online Teaching to Enhance Student Learning: Theory, Practice and Assessment

Tisha Bender

As online courses proliferate, teachers increasingly realize that they have to connect with their students as they would in face-to-face classes. They have to provide true opportunities for inspirational and meaningful learning, rather than a sterile experience of clicking within a labyrinth of links.

With the specific purpose of switching emphasis from the technical issues of online teaching to the human implications of teaching and learning through the Internet, Tisha Bender draws on her extensive research, her training of online faculty, and her own online teaching experience, to create a fresh vision of online pedagogy. Discussion-Based Online Teaching to Enhance Student Learning consists of three parts:

Theory

Practice

Assessment

The author shows how she applies learning theories to online discussion-based courses. She presents a wealth of suggestions and techniques, illustrated by real examples, for stimulating and managing online discussion effectively, and for improving teaching practices. The book concludes with methods for assessing the efficacy of online courses.

This accessible and comprehensive book offers an engaging and practical approach to online teaching that is rooted in the author's experience and enthusiasm for creating a virtual environment that engages students and fosters their deep learning. This is a book for all educators and administrators in higher education, in any discipline, engaged in, or contemplating offering, online classes that involve discussion or collaborative learning. It is relevant both to faculty teaching a hybrid and face-to-face classes, and courses conducted entirely online.
